CATALYTIC DISTILLATION TECHN	OLOGIES					
This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.						
2. This REPORT consists of a total of sheets, including this cover sheet.						
This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).						
These annexes consist of	a total of sheets.					
3. This report contains indic	cations relating to the following	items:				
I Basis of the re	I Basis of the report					
II Priority						
III Non-establishr	ment of report with regard to no	ovelty, inventive step an	d industrial applicability			
IV Lack of unity	of invention					
V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement						
VI Certain documents cited						
VII Certain defects in the international application						
VIII Certain observations on the international application						
Date of submission of the demand	Da	te of completion of this	report			
23 April 2004 (23.04.2004)		20 February 2005 (20.02.2005)				
Name and mailing address of the IPEA/US		thorized officer	DEDODALIA THOMAS

Form PCT/IPEA/409 (cover sheet)(July 1998)						

International application No.	
PCT/US03/26153	

I.	Basis	s of the report			
1.	With	regard to the elements of the international application:*			
	\boxtimes	the international application as originally filed.			
	\boxtimes	the description:			
•	•	pages 1-20 as originally filed			
		pages NONE , filed with the demand pages NONE , filed with the letter of			
		the claims:			
		pages 21 and 22 , as originally filed pages NONE , as amended (together with any statement) under Article 19			
		pages NONE , filed with the demand			
		pages NONE , filed with the letter of			
	\boxtimes	the drawings:			
		pages 1, as originally filed			
		pages NONE , filed with the demand pages NONE , filed with the letter of			
	لـــا	the sequence listing part of the description:			
		pages NONE , as originally filed pages NONE , filed with the demand			
		nages NONE filed with the letter of			
2	. Wit	h regard to the language, all the elements marked above were available or furnished to this Authority in the			
	lang	uage in which the international application was filed, unless otherwise indicated under this item.			
	The	se elements were available or furnished to this Authority in the following language which is:			
		the language of a translation furnished for the purposes of international search (under Rule23.1(b)).			
		the language of publication of the international application (under Rule 48.3(b)).			
		the language of the translation furnished for the purposes of international preliminary examination(under Rules			
		55.2 and/or 55.3).			
3	. Wit	th regard to any nucleotide and/or amino acid sequence disclosed in the international application, the rnational preliminary examination was carried out on the basis of the sequence listing:			
		contained in the international application in printed form.			
		filed together with the international application in computer readable form.			
		furnished subsequently to this Authority in written form.			
ł		furnished subsequently to this Authority in computer readable form.			
		The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the			
	_	international application as filed has been furnished.			
		The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.			
		•			
ľ	ŧ	The amendments have resulted in the cancellation of:			
ł		the description, pages NONE			
ı		the claims, Nos. NONE			
		the drawings, sheets/fig NONE			
	5.	This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**			
L.	* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to it this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17). ** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

International application No. PCT/US03/26153

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement						
1. STATEMENT						
Novelty (N)	Claims 1-12					
	Claims NONE	NO				
	Claims NONE	YES				
Inventive Step (IS)	Claims NONE Claims 1-12	NO				
	-					
Industrial Applicability (IA)	Claims 1-12	YES NO				
	Claims NONE					
2. CITATIONS AND EXPLANATIONS Claims 1-13 lack an inventive step under PCT Article 33(3) as being obvious over Luebke (5,449,501). Luebke disclose totally hydrogenating hydrocarbon olefins in a catalyst distillation column reactor (the abstract; col. 2, line 39). Luebke does not disclose that a feedstock containing a plurality of different unsaturated olefins (see the entire patent for details). However, as taught by Luebke, one having ordinary skill in the art at the time of the invention was made who wishes to hydrogenate a mixture of olefins since Luebke teaches that his process can be use to totally hydrogenate olefine hydrocarbons. Regarding claims 2 and 3, it is expected that the Luebke process can be used to hydrogenate any feedstock having any concentration of olefins as taught by Luebke. Regarding claims 4 and 5, if there is any amount of unhydrogenated hydrocarbons, these unreacted components should be recovered for recycle. The conversion as claims 6 depends on the selected chemical reaction prameters such as temperatures and pressures which must be selected to optimize the process as called for in claims 7, 8, 12, and 13. Regarding claims 9-11, any feedstock is expected to yield similar results provided that the feedstock contain olefinic hydrocarbons. Claims 1-13 has an industrial applicability as defined by PCT Article 33(4). The claimed process can be used for producing paraffins. NEW CITATIONS
